

Dear FCC, I have just learned of NAB's petition 04-160 to limit what XM satellite radio can offer to there very loyal and happy subscribers. I'm refering mainly to the weather and road reports XM has just recently offered to us. As a long haul truck driver I use these services on a daily basis and find them to be extremely helpful. It would be a shame if you allow NAB's petition to go through. XM is the best radio thats ever come thru my speakers and I would like to see it stay that way. Please reject 04-160.

Sincerly,

Michael Hewitt
